Education

[Your University Name]

Bachelor of Technology in Computer Science & Engineering | **CGPA: X.X/10**

Hyderabad, India

[Month Year]

Technical Skills

Languages: Java 8/11/17+, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Core Concepts: OOP, SOLID Principles, Design Patterns (GoF), Microservices, System Design, REST APIs, gRPC

Frameworks & Libraries: Spring Boot 3.x, Spring Data JPA, Spring Cloud, Spring MVC, Hibernate 6.x, Java SPI

Testing: TDD, JUnit 5, Mockito, TestContainers, Spring Boot Test, Integration Testing, JaCoCo, SonarQube

Messaging & Streaming: Apache Kafka, RabbitMQ **Databases:** PostgreSQL, Oracle, MongoDB, Redis, HikariCP

DevOps & Cloud: Jenkins, GitLab CI, GitHub Actions, Docker, Cloud Foundry, Kubernetes (basics), AWS (basics)

Frontend (Secondary): StencilJS, Web Components, React.js, React Native, Angular, Highcharts, Ag-Grid, Jest

Experience

Backend Software Engineer

[Start Month Year] – Present

DBS Tech India (PayLah Platform)

Hyderabad, India

- Delivered backend features across four core microservices of the **PayLah digital wallet platform** (Java 17, Spring Boot 3.x) processing millions of daily transactions across SG, HK, and TW
- Built a **Java SPI-based QR Payment Hub** enabling WeChat Pay, Alipay+, and NETS International as pluggable providers with 6-phase orchestration — FX lock, wallet earmarking, gateway confirmation, and regional settlement
- Developed **263+ unit and functional test cases** achieving **90%+ code coverage**; applied TDD across multi-rail routing and concurrent edge-case scenarios, reducing production defects by **~40%**
- Led **JDBC to Spring Data JPA migration** across 85+ DB tables with zero downtime; upgraded to Spring Boot 3.x + Java 17, cutting **~40% DAO boilerplate** and improving query latency by **<2ms**

Associate Software Engineer

[Start Month Year] – [End Month Year]

ADP India

Hyderabad, India

- Redesigned interactive **HR analytics dashboards** with multi-chart views, PDF/CSV/Excel export, and a custom dashboard builder deployed across the ADP analytics product
- Built fully portable **StencilJS web components** consumed across Angular, React, and Flutter apps; achieved **100% Jest test coverage** per component

Key Projects

Cross-Border QR Payment Hub (CBPS) – PSP QR Payment Hub

DBS Tech India

- Designed a **Java SPI-based** region-agnostic payment hub (Java 17, Spring Boot 3.x, Kafka, Docker) enabling WeChat Pay, Alipay+, and NETS International as pluggable providers; single codebase deployed across SG, HK, and TW with region-specific FX qualification, settlement paths, and compliance layers
- Implemented **6-phase orchestration**: QR validation, FX rate lock via RAPID API, wallet earmarking, gateway confirmation, post-processing (cashback, loyalty stamps), and regional DC settlement

PayLah – Zero-Downtime JPA Migration

DBS Tech India

- Migrated **50+ entity mappings** (JDBC to Spring Data JPA) across 85+ DB tables using **dual-write canary deployment**; maintained 100% data integrity throughout Spring Boot 3.x + Java 17 upgrade
- Achieved **<2ms query latency improvement** and **~40% reduction in DAO boilerplate**; migrated key DAOs with @OneToMany/@ManyToOne relationships and @Version optimistic locking

CivicPulse AI – Civic Issue Management Platform

GitHub

- Built a full-stack **mobile platform** where citizens report infrastructure issues with image uploads; an **AI agent** auto-detects issue category, estimates severity, and routes tickets to the correct government department
- Implemented a **RAG pipeline** over historical complaint data using **FAISS** to inform priority scoring and resolution suggestions based on past area-specific outcomes
- Built a government dashboard for **SLA tracking** and ticket assignment, and an **AI assistant** that answers citizen queries about complaint status by retrieving live ticket and department resolution history

Achievements & Certifications

- Microsoft Azure Fundamentals (AZ-900)** – Microsoft, [Month Year]
- GATE [Year]** – All India Rank [XXX]; strong CS fundamentals in algorithms, data structures, and system design
- [Add any recognition, awards, or notable achievements from DBS or ADP here]
